

# Java educational website

-Made by Media2020Gp48

Our educational website will use interactive media to support learning, practice and assessment of a topic in JAVA programming. The educational website is expected to help users master the concepts, principles, processes and algorithms of JAVA programming. The website offers a variety of learning methods, including code explanations, independent experiments and learning evaluation, to help users fully understand their learning situation, so as to achieve efficient and autonomous JAVA studying. We hope to submit a platform for users to learn and communicate through the educational website.

The following are some instructions for using the website. Hope you can enjoy this website.

## TIPS:

1. Users can click the logo on any interface to return to the home page
2. Multimedia interaction

Click this button to get the developer's QQ
